ENTITY AND REPORTING CHARACTERISTICS Entity Characteristics

EC2

Nature of ownership

• Public (listed) entity Specify ISIN:

US92276F1003

Legal status:

Property companyReal Estate Investment Trust (REIT)

Private (non-listed) entity

O Government entity

EC3

Entity commencement date

Year of commencement (listed) or Year of establishment (non-listed) 1987

EC4

Reporting year

Calendar year
 Fiscal year

ENTITY AND REPORTING CHARACTERISTICS

Reporting Characteristics

RC1

Reporting currency

Values are reported in:

USD United States Dollar

RC2

Economic size

What was the gross asset value (GAV) of the entity at the end of the reporting year in millions?

29,331.27

RC3

Floor area metrics

Metrics are reported in:

m2sq. ft.

RC4

Property type and Geography

```
Portfolio predominant location (*): United States of America
```

Portfolio predominant property type (**): Healthcare

RC5

The entity's core business:

O Management of standing investments only (continue with Management and Performance Components)

Management of standing investments only (continue with Management and renormance components)
 Management of standing investments and development of new construction and major renovation projects (continue with Management, Performance, and Development Components)
 Development of new construction and major renovation projects (continue with Management and Development Components)

LEADERSHIP ESG Commitments and Objectives

LE1

ESG leadership commitments

Has the entity made a public commitment to ESG leadership standards and/or principles?

O Yes

Select all commitments included (multiple answers possible)

- Climate Action 100+
- Global Investor Coalition on Climate Change (including AIGCC, Ceres, IGCC, IIGCC)
- International Labour Organization (ILO) Standards
- Montreal Pledge
- OECD Guidelines for multinational enterprises
- PRI signatory
- RE 100

Science Based Targets initiative

- Task Force on Climate-related Financial Disclosures (TCFD)
- UN Environment Programme Finance Initiative
- VN Global Compact UN
- 🕑 UN Sustainable Development Goals
- WorldGBC's Net Zero Carbon Buildings Commitment

Not publicly available

Communicate the objectives and explain how they are integrated into the overall business strategy (maximum 250 words)

Ventas believes a strong, independent Board, commitment to sustainability, and socially responsible practices are essential to delivering shareholder value. We are committed to maintaining corporate governance practices that are in the best interests of stockholders. Our practices and policies promote fairness, alignment, accountability of management, transparency, risk management and delivery of consistent, superior returns.

We follow many best governance practices; our dedication to our stockholders goes beyond rules-based compliance. Our approach is embedded in our culture; it is also borne out by our performance, employee relationships, investors, business partners, and external recognition.

Ventas's commitment to sustainability is a key corporate value. As a leading owner of healthcare real estate, we support and apply measurable sustainability practices and standards. Sustainability practices are embedded in our acquisitions, asset management and property management processes. These practices create value for our shareholders through operating efficiencies, while preserving the planet. Sustainability provides opportunities to invest in our portfolio, improve our emissions footprint, reduce consumption, improve operating metrics, and expand our ENERGY STAR and LEED certifications.

Ventas has short- and long-term (10-year) reduction targets for energy, GHG emissions, water, and waste; and progress is measured annually. Ventas seeks to maintain and improve our leadership position in ESG disclosures, performance, and reduce risks from bribery and corruption.

Charitable giving is an important value; we believe we have a responsibility to improve the lives of others. Through the Ventas Charitable Foundation, we contribute to local and national organizations that are important to our employees and customers.

ESG senior decision-maker

Does the entity have a senior decision-maker accountable for ESG issues?

O Yes

Provide the details for the most senior decision-maker on ESG issues

Name	
Debra A. Cafaro	
Job title	
Chairman of the Board and Chief Executive Officer	
The individual's most senior role is as part of	

O Board of Directors

O C-suite level staff

O Investment Committee

Fund/portfolio managers

O Other

Describe the process of informing the most senior decision-maker on the ESG performance of the entity (maximum 250 words)

The most senior decision maker on sustainability performance is Ms. Debra A. Cafaro, Chairman and CEO of Ventas. Ms. Cafaro is a member of our ESG Steering Committee, which meets at least quarterly. In addition, Ms. Cafaro receives regular email updates from the Director of Sustainability on Ventas sustainability and ESG initiatives. Ms. Cafaro is also consulted on a regular basis via ad hoc emails and discussions for guidance on sustainability memorandums. Specific topics include, for example: performance of any new sustainability projects or initiatives within the Ventas portfolio and discussions of performance against our short- and long-term environmental reduction targets.

O No

LE6

Personnel ESG performance targets

Does the entity include ESG factors in the annual performance targets of personnel?

O Yes

Does performance on these targets have predetermined consequences?

O Yes

Financial consequences

Select the personnel to whom these factors apply (multiple answers possible):

- Board of Directors
- C-suite level staff
- Investment Committee
- Fund/portfolio managers
- Asset managers
- ESG portfolio manager
- Investment analysts
- Dedicated staff on ESG issues
- External managers or service providers Investor relations
- All employees
- Other

Non-financial consequences

Select the personnel to whom these factors apply (multiple answers possible):

- Board of Directors C-suite level staff Investment Committee
- Fund/portfolio managers
- Asset managers
- ESG portfolio manager
- Investment analysts
- Dedicated staff on ESG issues
- External managers or service providers
- Investor relations
- All employees Other

https://www.ventasreit.com/sites/default/files/flipbooks/csr-2019/index.html#p=16 Indicate where the relevant information can be found

Energy, Emissions, Water, Waste: See Planet goals page (p.24 of report, 25 of PDF)

Resilience, Climate/climate change adaptation - see Planet section, especially pages 48-51 (49-52 of PDF)

Pollution prevention: see p.23 of report (24 of PDF) under Responsible Investment - Ventas has a goal of achieving LEED Silver certification or better on 100% of our \$1.5B Research & Innovation development pipeline; developing in line with LEED standard helps prevent pollution, as we each project is required to meet a prerequisite on construction pollution prevention per the guidelines (see https://www.usgbc.org/credits/core-shell-healthcare-new-construction-retail-nc-schools/ v2009/ssp1)

Biodiversity and habitat: see p. 45 of report (46 of PDF) under Responsible Investment - "Ventas is committed to environmentally and socially responsible development in collaboration with our

operating partners, including the pursuit of LEED certification, developing urban brownfields and infill sites, and supporting urban revitalization through our developments." Brownfield development (development on sites previously used for industrial or commercial purposes) prevents loss of biodiversity and habitat by making use of previously developed land to avoid developing greenfields or untouched / undeveloped land that may contain wildlif. We also pursue sustainable site credits noted in this article on developments when applicable: https://www.usgbc.org/articles/leed-credits-help-protect-wildlife.

- Social interaction and connection
- Thermal comfort
- 🛃 Water quality

Injury Rate: Consistent with DJSI, we track lost-time injury frequency rate for employees (per one million hours worked)

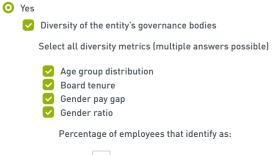

Exceeds PTO hours: Ventas provides employees with a set amount of paid-time-off. The Ventas Human Resources Department monitors employees who exceed the set annual limit and works with managers to address any issues. In 2019, the exceeded PTO hours per employee were 0.003. All employees are covered by the Occupational Safety and Health Administration mandates and protocols.

		International background Racial diversity Socioeconomic background

Provide additional context for the response (maximum 250 words)

Ventas is made up of a talented group of results-driven, experienced and dedicated professionals with an unwavering commitment to integrity, high-performance, adaptability and collaboration. We uphold equal opportunities for all and believe our organization is stronger and more effective with a diverse workforce and Board of Directors. To that end, we strive for gender balance (50)50 female to male) across our organization by seeking a gender-balanced pipeline of candidates and using a merit-based approach to hiring and advancement.

O No

REPORTING CHARACTERISTICS Reporting Characteristics

R1.1

The entity's standing investments portfolio during the reporting year

The indicator below is automatically populated by GRESB based on information provided through the reporting entity's GRESB Asset Portal. Participants can access the Asset Portal via the Assessment Portal menu, section ASSETS.

Property type	Number of Assets F	loor Area (ft ²)	% GAV
Healthcare: Healthcare Center	49	6979110.0	7.04
Healthcare: Senior Homes	777	64340560.74	66.62
Office: Medical Office	349	18870767.0	19.1
Technology/Science: Laboratory/Life Science	s 33	5146785.0	7.24
Total	1208	95337222.74	100.0

Note: This table is generated by GRESB and represents an aggregation of the data provided at the asset level. It is provided for review purposes and defines the scope of your 2020 GRESB Performance Component submission. It should reflect the total standing investments portfolio and exclude any development and/or major renovation projects, exclude vacant land, cash or other non real estate assets owned by the entity. You are not able to amend information in this table, with the exception of "% GAV" (this is because GAV is an optional field at asset level and cannot be used for aggregation). Please note that % GAV is used for entity and peer group classification and should accurately reflect the composition of the portfolio.

Provide applicable evidence

RISK ASSESSMENT Risk Assessments

RA1

Risk assessments performed on standing investments portfolio

Has the entity performed asset-level environmental and/or social risk assessments of its standing investments during the last three years?

Yes Select all issues included (multiple answers possible) Biodiversity and habitat Building safety and materials Percentage of portfolio covered 100 Climate/climate change adaptation Percentage of portfolio covered 78 Contaminated land Percentage of portfolio covered 100 Energy efficiency Percentage of portfolio covered 78 Energy supply Percentage of portfolio covered 78 Flooding Percentage of portfolio covered 100 GHG emissions Percentage of portfolio covered 78 Health and well-being Indoor environmental quality Vatural hazards Percentage of portfolio covered 100 Regulatory Percentage of portfolio covered 100 Resilience Percentage of portfolio covered 100 Socio-economic Transportation Vaste management Percentage of portfolio covered 44 Vater efficiency Percentage of portfolio covered 65 Water supply Other The risk assessment is aligned with a third-party standard ⊙ Yes O ISO 31000 Other Other selected. Please describe Environmental items: The Climate Registry's General Verification Protocol (aka California Climate Action Registry (CCAR))

Describe how the outcomes of the ESG risk assessments are used in order to mitigate the selected risks (maximum 250 words)

Ventas identifies and assesses asset-level risks related to environmental and social issues at all stages, from acquisition due diligence throughout the ownership of the asset. Risks are identified by multiple departments and levels at the organization, including the Ventas ESG Steering Committee, HR, Risk Management, Acquisitions, as well as with the assistance of our third-party energy partners, consultants, and engineers. On an asset level, Ventas commissions property condition reports, Phase I environmental surveys, and other due diligence items for all properties prior to acquisition and on a recurring cycle as part of asset and risk management processes. This ensures that known condition deficiencies are identified and addressed in a timely manner. When these reports identify risks, we proactively implement solutions to mitigate risks where we see fit. For example, adding seismic gas shutoff valves in high-risk areas or moving critical building infrastructure (switchgear, generators) to higher elevations in flood-prone buildings. Recommendations for property improvements are prioritized by the insurer and presented to and reviewed by the Ventas asset management team.

O No

	0%, <25%
	Other
Des	cribe the tenant engagement program and methods used to improve tenant satisfaction (maximum 250 words)

Collaboration and communication are foundational to successful asset management. We work hard to maintain an open line of communication with our tenants and operators with frequent touch points and meetings. We conduct regular satisfaction surveys in our Office portfolio, and our Seniors Housing operators conduct periodic resident satisfaction surveys. Our annual Corporate Sustainability Report is made available to all tenants and partners, which outlines our ESG strategies and accomplishments. We also meet with select tenants and operators to review annual environmental data benchmarking to increase engagement and help identify opportunities for improved efficiency. We also sent out a regular "Green Team" newsletter to all our MOB tenants during the reporting period to share resources on sustainability initiatives.

O No

TC2.1

Tenant satisfaction survey

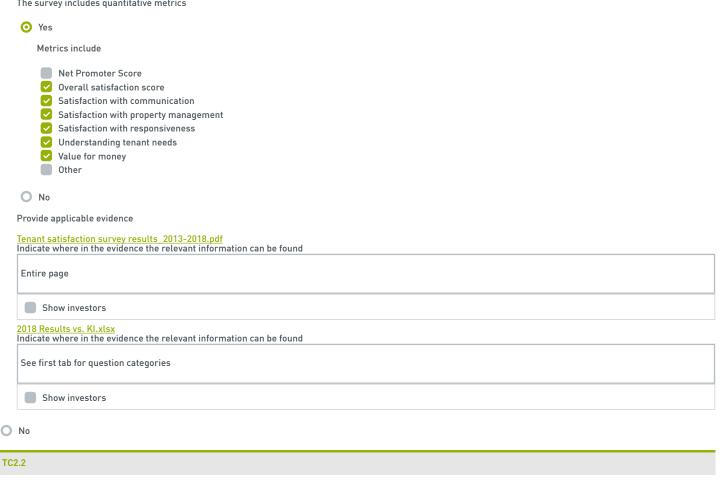

Has the entity undertaken tenant satisfaction surveys within the last three years?

• Yes

The survey is undertaken (multiple answers possible)

The survey includes quantitative metrics

Program to improve tenant satisfaction

Does the entity have a program in place to improve tenant satisfaction based on the outcomes of the survey referred to in TC2.1?

Yes

Select all applicable options (multiple answers possible)

Development of an asset-specific action plan

- Feedback sessions with asset/property managers
- Feedback sessions with individual tenants

Other

Other selected. Please describe

Sharing of best practices from asset management teams that score well in each area of the survey

Describe the tenant satisfaction improvement program (maximum 250 words)

Based on the results of the Medical Office tenant satisfaction survey (administered by Kingsley), Senior Leadership identified seven key survey categories around which action plans were created. The seven categories are those that have the highest impact on overall tenant satisfaction. Properties with scores below the Kingsley Index in these seven categories create an action plan that is specific, measurable and create accountability. Properties with scores above the Kingsley Index in these seven categories share their best practices, which are incorporated into others' action plans. All action plans are reviewed and approved by the property's Regional Manager. Based on the results of the Life Science tenant satisfaction survey (administered by Kingsley), Wexford Asset Management required action plans from all of property manager's on all categories found to fall below the Kingsley Index. Kingsley results, action plans and expectations were reviewed and discussed at our Annual Property Management Summit. Updated action plans were than drafted and submitted post summit. Action plans are reviewed and approved by the assigned Wexford Asset Manager. A major focus as a result of the Kingsley Survey was the elevation of customer service. The summit allowed an opportunity for all of our managers across the life science portfolio to come together and collaborate in addition to the benefit of listening to a keynote speaker in customer service excellence as well as participate in role playing.

TENANTS AND COMMUNITY Community

TC6.1

Community engagement program

Does the entity have a community engagement program in place that includes ESG-specific issues?

O Yes

Select all topics included (multiple answers possible)

- Community health and well-being
- Seffective communication and process to address community concerns
- Enhancement programs for public spaces
- Employment creation in local communities
- Research and network activities
- Resilience, including assistance or support in case of disaster
- Supporting charities and community groups
- ESG education program
- Other

Describe the community engagement program and the monitoring process (maximum 250 words)

Giving back to our community is an important value at Ventas. As an industry leader, we have a responsibility to improve the lives of others. Through the Ventas Charitable Foundation and other corporate donations we support organizations that are important to our employees, customers and communities. Our Employee Charitable Found allows employees to directly nominate nonprofit organizations to receive grants of up to \$4,000 per year. Since the program began, we have given more than \$70,000 to employee-nominated organizations, supporting more than 90% of requests. In 2019, we donated more than \$70,000 to organizations, including: After School Matters, Autism Speaks, EverThrive, Habitat For Humanity, High Jump, It Takes A Village, Lighthouse Family Retreat, and One Tree Planted and Unbound. Ventas also engages with communities via its operating partners, such as Atria and Wexford, who manage Ventas senior housing and life science properties, respectively. Atria and Wexford develop sustainable, LEED buildings, financed and owned by Ventas; these assets provide enhancements to public spaces and employment creation in local communities.

O No

TC6.2

Monitoring impact on community

Does the entity monitor its impact on the community?

🧿 Yes

Area-Aggregated Data coverages (%)		Data Coverage Time-Aggregated Data coverages (%)	Area/Time-Aggregated Data coverages (%)	Like-for-Like 2019/2018 Aggregated LFL changes (%)	LFL data coverage (%)	
Landlord Controlled	98.4	85.0	98.36	-3.48	88.58	
Tenant Controlled	71.3	41.0	71.3	-7.06	82.79	

The table above is automatically populated by GRESB based on information provided at the asset level by the GRESB participants through the GRESB Asset Spreadsheet. It displays a summary of aggregated Data Coverages and Like-for-Like consumption changes per property type, split by Landlord Controlled and Tenant Controlled areas. While "Area - Aggregated Data coverage" only accounts for the floor area size of assets when aggregating values, "Time - Aggregated Data coverage" accounts for the period of ownership. Consequently, "Area/Time - Aggregated Data coverage" aggregates both dimensions and is used for benchmarking purposes.

The table above is automatically populated by GRESB based on information provided at the asset level by the GRESB participants through the GRESB Asset Spreadsheet. It displays the aggregated GHG emissions values per property type, along with their related Floor Area Covered, Maximum Floor Areas and Like-for-like changes (%) in emissions.

Note: Scope 3 emissions in the 2020 GRESB Assessment are calculated as the emissions associated with tenant areas, unless they are already reported as Scope 1 or Scope 2 emissions (if they cannot be disassociated from emissions from other areas). Scope 3 emissions do not include emissions generated through the entity's operations or by its employees, transmission losses or upstream supply chain emissions.

Tenant Controlled	70.94	69.0	71.03	-2.1	69.82
	Area-Aggregated Data coverages (%)	Data Coverage Time-Aggregated Data coverages (%)	Area/Time-Aggregated Data coverages (%)	Like-for-Like 2019/2018 Aggregated LFL changes (%)	LFL data coverage (%)
Landlord Controlled	81.7	84.0	82.03	-3.68	79.8
Tenant Controlled	4.46	2.0	4.56	-10.9	4.46
	Area-Aggregated Data coverages (%)	Data Coverage Time-Aggregated Data coverages (%)	Area/Time-Aggregated Data coverages (%)	Like-for-Like 2019/2018 Aggregated LFL changes (%)	LFL data coverage (%)
Landlord Controlled	96.15	81.0	96.65	-3.54	87.88
Tenant Controlled	84.41	66.0	84.41	-0.4	84.41

The table above is automatically populated by GRESB based on information provided at the asset level by the GRESB participants through the GRESB Asset Spreadsheet. It displays a summary of aggregated Data Coverages and Like-for-Like consumption changes per property type, split by Landlord Controlled and Tenant Controlled areas. While "Area - Aggregated Data coverage" only accounts for the floor area size of assets when aggregating values, "Time - Aggregated Data coverage" accounts for the period of ownership. Consequently, "Area/Time - Aggregated Data coverage" aggregates both dimensions and is used for benchmarking purposes.

	Supply chain, Public outreach and engagement

The strategy is

Provide applicable evidence

Provide hyperlink

https://ventasreit.com/about-ventas/corporate-responsibility/environmental-sustainability https://ventasreit.com/about-ventas/corporate-responsibility/environmental-sustainability

Indicate where the relevant information can be found

Whole page, especially LEED goal (Ventas has set a goal to achieve LEED Silver certification or better on 100% of our \$1.5 billion Research & Innovation development pipeline);

LEED v4 for Building Design and Construction 1 PAGE (2).xlsx Indicate where in the evidence the relevant information can be found

Whole document; To build to LEED, projects must meet prerequisites in pollution prevention, water use, energy performance (which is directly related to emissions), waste management (via storage of recyclables), and indoor air quality.

Show investors

Communicate the objectives and explain how they are integrated into the overall business strategy (maximum 250 words)

Ventas's new developments and major renovations seek LEED certification and thus meet high standards for sustainable development. Ventas thoughtfully and purposefully promotes sustainability in its communities and regularly includes energy-efficient lighting and appliances, water-efficient landscaping [plants and irrigation systems], low-flow fixtures, ENERGY STAR-certified appliances, high-performance exterior doors, green housekeeping, recycling and landscape projects, on-site storage treatment of storm water to reduce erosion and green building education for our residents and guests. All new developments in our Office and Senior Housing Operating platforms are incorporated into utility bill payment systems that are rolled up to our centralized utility platform (managed and verified by a third party), giving us visibility into energy, water and waste consumption.

O No

DRE2

Does the entity require sustainable site selection criteria to be considered for development projects?

• Yes

Select all criteria included (multiple answers possible)

		Connect to multi-modal transit networks
		Locate projects within existing developed areas
		Protect, restore, and conserve aquatic ecosystems
		Protect, restore, and conserve farmland
	 ✓ 	Protect, restore, and conserve floodplain functions
	 ✓ 	Protect, restore, and conserve habitats for native, threatened and endangered species
	Ō	Protect, restore, and conserve historical and heritage sites
		Redevelop brownfield sites
	Ō	Other
Ο	No	

DRE3

Site design and development requirements

Does the entity have sustainable site design/development requirements for development projects?

• Yes

Select all criteria included (multiple answers possible)

- ✓ Manage waste by diverting construction and demolition materials from disposal
- 🛃 Manage waste by diverting reusable vegetation, rocks, and soil from disposal
- Minimize light pollution to the surrounding community
- Minimize noise pollution to the surrounding community
- Perform environmental site assessment
- Protect air quality during construction
- 🕏 Protect and restore habitat and soils disturbed during construction and/or during previous development
- Protect surface water and aquatic ecosystems by controlling and retaining construction pollutants
 Other

O No

DEV - MATERIALS Materials

DMA1

Materials selection requirements

Does the entity have a policy requiring that the environmental and health attributes of building materials be considered for development projects?

Ye	s
Se	lect all issues addressed (multiple answers possible)
C	 Requirement for disclosure about the environmental and/or health attributes of building materials (multiple answers possible) Environmental Product Declarations Health Product Declarations Other types of required health and environmental disclosure:
l	 Material characteristics specification preferences, including (multiple answers possible) Locally extracted or recovered materials Low embodied carbon materials Low-emitting VOC materials Materials and packaging that can easily be recycled Materials that disclose environmental impacts Materials that disclose potential health hazards Rapidly renewable materials or ingredients that should not be used on the basis of their human and/or environmental impacts Third-party certified wood-based materials and products Types of third-party certification used: Forest Stewardship Council (FSC), Program for the Endorsement of Forest Certification schemes (PEFC), Appalachian Hardwood Manufacturers, Inc. (AHMI) Sustainable Hardwood Forest

DSE1

Health & Well-being

Does the entity take measures to incorporate occupant health & well-being in its development projects?

• Yes

The entity addresses health and well-being in the design of its product through (multiple answers possible)

0022...

On-site safety

Does the entity promote on-site safety during the construction phase of its development projects?

O Yes

The entity promotes on-site safety through (multiple answers possible)

Availability of medical personnel
 Communicating safety information
 Continuously improving safety performance
 Demonstrating safety leadership
 Entrenching safety practices
 Managing safety risks
 On-site health and safety professional (coordinator)
 Personal Protective and Life Saving Equipment
 Promoting design for safety
 Training curriculum
 Other

DSE2.2

Safety metrics

Does the entity monitor safety indicators at construction sites?

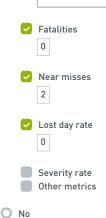

O Yes

Select all applicable options (multiple answers possible)

Explain the injury rate calculation method (maximum 250 words)

Ventas's development partners (primarily Atria Senior Living, Pacific Medical Buildings, Sunrise, and Wexford Science + Technology) are required to comply with OSHA and follow the OSHA Recordable Incident Rate methodology. To our knowledge, there was one recordable injury during the reporting year. The Recordable Incident Rate was calculated dividing the number of recordable incidents during the reporting year by the total estimated number of workers on construction sites during the reporting year. We have estimated that the total number of workers on our projects at any given time were to be on average 98 workers for smaller projects, and on average 195 for larger projects. This equals an injury rate of 0.03%. (Note: the individual who sustained the recordable injury was retasked, so there was no lost time as a result.)

DEV - STAKEHOLDER ENGAGEMENT Supply Chain

DSE3.1

Contractor ESG requirements

Does the entity have ESG requirements in place for its contractors?

O Yes

Select all topics included (multiple answers possible)

- 🗸 Child labor
- Community engagement
- Environmental process standards
- Environmental product standards
- 🛃 Health and well-being
- Human rights

Other

- Human health-based product standards
- Occupational safety
- Labor standards and working conditions

Percentage of projects covered 100

DSE3.2

Contractor monitoring methods

Does the entity monitor its contractors' compliance with its ESG-specific requirements in place for this entity?

O Yes

Select all methods used (multiple answers possible)

DEV - STAKEHOLDER ENGAGEMENT Community Impact and Engagement

DSE4

Community engagement program

Does the entity have a community engagement program in place that includes ESG-specific issues?

O Yes

Select all topics included (multiple answers possible)

- Effective communication and process to address community concerns
- Employment creation in local communities
- Enhancement programs for public spaces
- SG education program
- Research and network activities
- Resilience, including assistance or support in case of disaster
- Supporting charities and community groups
- Other

Describe the community engagement program and the monitoring process (maximum 250 words)

Community health and well-being: Ventas demonstrates our commitment to sustainable buildings and development through our LEED® and ENERGY STAR® certifications. LEED is an internationally recognized green building certification system. LEED buildings are designed to use less water and energy, reduce greenhouse gas emissions, and improve occupant and community wellbeing.

ESG education: Ventas has several goals to help ensure responsible investment, including to communicate to all development partners the importance of investigating and pricing LEED or other sustainability certification for all new projects, through discussions with C-suite leadership by 2020

Supporting charities and community groups: We believe that Ventas has a responsibility to actively engage in improving the lives of people in the communities where we operate and where our employees live. Each year, we donate approximately \$1 million to non-profit organizations that inspire us. We also encourage our employees to give back to their communities, and many of our team are deeply involved in a wide variety of organizations at both the local and national level.

O No

DSE5.1

Community impact assessment

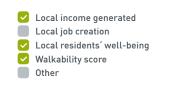

Does the entity assess the potential socio-economic impact of its development projects on the community as part of planning and pre-construction?

O Yes

Select the areas of impact that are assessed (multiple answers possible)

Housing affordability

- Impact on crime levels
- Livability score

O No

DSE5.2

Community impact monitoring

Does the entity have a systematic process to monitor the impact of development projects on the local community during different stages of the project?

O Yes

The entity's process includes (multiple answers possible)

- Analysis and interpretation of monitoring data
- 🕑 Development and implementation of a communication plan
- Development and implementation of a community monitoring plan
- Development and implementation of a risk mitigation plan
- Identification of nuisance and/or disruption risks
- Identification of stakeholders and impacted groups
- 🕑 Management practices to ensure accountability for performance goals and issues identified during community monitoring
- Other

Describe the monitoring process (maximum 250 words)

Local communities are engaged throughout the development process to ensure issues are addressed and needs are met. Impact assessments are conducted as needed or required to understand the impacts on local communities, and mitigation plans are developed if necessary. Ventas and its development partners strive to minimize nuisances and disruptions from construction sites, and notify local residents of any unavoidable nuisances or disruptions. Communication is through press releases, regular fliers and posters with address and phone numbers for the site and contact information, as well as a central registry at city hall for the community to contact with questions.

Ventas has an integrated, multi-disciplinary company-wide risk management process, which is managed through our Enterprise Risk Management (ERM) Committee. Climate change risks and opportunities are integrated into this process. The ERM Committee meets at least quarterly to review and update our Risk Heat Map. The Ventas Director of Sustainability and Director of Corporate Risk Management have day-to-day responsibility for identifying and assessing climate-related risks. These risks are monitored on an ongoing basis. As a long-term holder of real estate, Ventas considers risks up to 10 or more years into the future, as well as near term and medium term risks.

For transitional climate change-related risks and opportunities, the Ventas Director of Sustainability works with the Ventas ESG Steering Committee or the Ventas Management Capital Committee (if related to an investment opportunity) to develop a plan to mitigate the risk or capitalize on the opportunities. Working groups or task forces within the company would be formed as needed to implement the activities needed to mitigate or capitalize on the risks. The Director of Sustainability would work with the relevant groups across the Ventas organization to implement any measures approved by the ESG Steering Committee or Management Capital Committee.

To manage physical climate change-related risks and opportunities associated with new acquisitions or developments, the Ventas Corporate Risk Management team works with the Investments team to evaluate risks and secure appropriate insurance coverage. We also assess our geographic NOI concentration to limit risk from local weather events. For existing assets, the Risk Management team collaborates with our property insurance carriers, the Ventas asset and property management teams and our operating partners to ensure that our properties are prepared for severe weather and related emergencies. We also implement, where appropriate, physical plant risk mitigation strategies such as automatic gas shut-off valves.

RS7

Has the organization assessed the potential financial impacts of climate-related risks on the entity?

Yes Please describe the potential impacts that each of the risk factors identified in RS4, RS5, and RS6 have on the entity (select all that apply): Transition risks Transition risk 1 Please describe the potential financial impact of the transition risk factor 1 (identified in RS4) on the entity: Policy and legal: Mandates on and regulation of existing products and services - Ventas' active development/redevelopment commitments are about \$500M. Assuming a 3% increase (mid-point of the 1% - 5% estimate noted above), Ventas would face \$15M of higher costs development costs. On what timeframe is this risk expected to impact the entity? It is already impacting the entity. • Within the timeframe of the investment horizon of the entity. O After the timeframe of the investment horizon of the entity but within the lifetime of the real assets included in the entity. Transition risk 2 Please describe the potential financial impact of the transition risk factor 2 (identified in RS4) on the entity: Reputation: Increased stakeholder concern or negative stakeholder feedback - As more capital providers use climate change impacts to direct their investments, the supply of capital for companies that don't meet the criteria will be reduced. This is likely to impact a relatively small amount of capital relative to all capital available and is difficult to quantify. If it were assumed that the overall impact is a 2.5 basis points decrease to our enterprise value, due to higher costs of debt and equity, this would result in an unmitigated impact of \$7.95 million (based on Ventas enterprise value of \$31.8 billion as of 12/31/2018]. On what timeframe is this risk expected to impact the entity? It is already impacting the entity. Within the timeframe of the investment horizon of the entity. O After the timeframe of the investment horizon of the entity but within the lifetime of the real assets included in the entity. Transition risk 3 Physical risks 🔽 Physical risk 1 Please describe the potential financial impact of the physical risk factor 1 (identified in RS5) on the entity: Increased severity of extreme weather events such as cyclones and floods: Ventas seeks to mitigate its exposure to premium increases in the near term by ensuring that we have resilient buildings that can withstand extreme weather and implementing strong emergency preparedness plans at our buildings. The costs related to this are primarily existing internal overhead, but may include costs to upgrade physical plant up to ~\$100,000. Long-term, Ventas seeks to reduce its greenhouse gas emissions to moderate climate change. These expenditures will vary widely depending of the economics of emissionsreductions projects, such as installing energy-efficient equipment and are not included here. On what timeframe is this risk expected to impact the entity? It is already impacting the entity. • Within the timeframe of the investment horizon of the entity. O After the timeframe of the investment horizon of the entity but within the lifetime of the real assets included in the entity. Physical risk 2 Physical risk 3 Social risks Can the entity provide evidence as an UPLOAD or URL? O Yes Provide hyperlink https://www.ventasreit.com/sites/default/files/pdf/CDP_2019_Report.pdf https://www.ventasreit.com/sites/default/files/pdf/CDP 2019 Report.pdf Indicate where the relevant information can be found This is documented in our public CDP disclosure in section C2. Risks & Opportunities.

Long-term, Ventas seeks to reduce its greenhouse gas emissions to moderate climate change. These expenditures will vary widely depending of the economics of emissions-reductions projects, such as installing energy-efficient equipment and are not included here. Social risk management and value creation strategies Can the entity provide evidence as an UPLOAD or URL? O Yes O No No No Provide additional context for the answer provided (maximum 250 words) Major risk strategies outlined in our 10-K: Transition risk strategies:

1. Gain experience in construction methods and research high performance materials/equipment to minimize additional costs (e.g., through dedicated sustainability resources and partnering with developers who focus on LEED development). A dedicated Director of Sustainability position was created in 2016 and this resource is working with our Construction and Development group on sustainable development policies to mitigate this risk.

2. Make sustainability a focal point for our existing portfolio and a factor in our acquisition and divestiture strategy. Spearheading these efforts is a Director of Sustainability (hired in 2016) and an ESG Committee. The ESG Committee is comprised of employees from different functional areas that meet regularly to consolidate and improve our awareness, information collection and disclosure regarding environmental matters.

Physical risk strategy: Ventas seeks to mitigate its exposure to premium increases in the near term by ensuring that we have resilient buildings that can withstand extreme weather and implementing strong emergency preparedness plans at our buildings. The costs related to this are primarily existing internal overhead, but may include costs to upgrade physical plant up to ~\$100,000. Long-term, Ventas seeks to reduce its greenhouse gas emissions to moderate climate change. These expenditures will vary widely depending of the economics of emissions-reductions projects, such as installing energy-efficient equipment and are not included here.

NAREIT LEADER IN THE LIGHT

Nareit Leader in the Light

Q1

Describe your organization's ESG goals for 2019 and how it performed against these goals.

1. Goal: Integrate ESG principles throughout Ventas business practices and culture

Progress: Ventas completed its first comprehensive ESG materiality assessment (an ESG best practice) which identified eight material topics: Talent Attraction/Retention, Tenant Satisfaction, Responsible Investment, Diversity & Inclusion, Climate Change, Energy/Emissions, Water and Waste. We developed quantitative goals and metrics to measure our progress on each material topic and published detailed information and tracking against goals in our 2019 Corporate Sustainability Report (CSR).

2. Goal: Expand our actions on Diversity & Inclusion

Progress: Ventas maintained its gender-balanced organization in 2019 with 48% female employees, and was named to the Bloomberg Gender Equality Index for the first time, with high marks for gender pay parity and sexual harassment policies. Ventas also signed the United Nations Women's Empowerment Principles to support the advancement of workplace gender equality. Our Diversity & Inclusion employee resource group hosted several events including a powerful in-person, interactive unconscious bias training in early 2020 for all corporate employees. Demonstrating our continued commitment to data and transparency, we expanded our 2019 CSR D&I disclosures to include employee ethnicity and age data. 3. Goal: Contribute to the success of communities where we operate by supporting essential community needs in education, health and the environment

Progress: In 2019, Ventas announced a ~\$9 million donation for a new K-8 public school facility in West Philadelphia. The \$40 million project will provide a state-of-the-art learning environment focused on inquiry, research and collaboration for more than 800 local students. Ventas is an active long-term property owner in West Philadelphia with a major investment footprint in the uCity innovation district (see Q2 for more on innovation districts).

4. Goal: Collaborate with our operating partners and tenants to continue to reduce the environmental impact of our portfolio through green building certifications and energy efficiency investments.

Progress: In 2019, Ventas collaborated with our top senior housing operators/tenants to earn the most seniors housing ENERGY STAR certifications of any owner, with more than 50% of all U.S. 2019 ENERGY STAR certifications and 100% of Canada certifications for this sector. Ventas certified 44 U.S. senior housing communities (nearly 3M sqft) and six Canadian communities. We also earned our inaugural IREM Certified Sustainable Property (CSP) certification in 2019 at an MOB in California. Additionally, Ventas invested ~\$30M in energy reduction initiatives (primarily LED retrofits and BAS upgrades) and reduced our year-over-year same-store energy use by ~1% and emissions by 1.7%.

Q2

Describe the innovative ESG strategies and technologies implemented in the last 12 months by your organization. Include relevant metrics when describing results.

Innovative Crisis Response: When the COVID pandemic hit, Ventas immediately took action to support our tenants, operators, and employees. We set up an internal task force dedicated to helping our operators and tenants navigate government relief programs and COVID testing, providing research, regular email communications, an email helpline, and a dedicated website. We also provided COVID-19 testing kits and analysis from Mayo Clinic Laboratories, free of charge, to certain of our senior living operators to enhance the safety of Ventas's senior living communities. Through our Mayo partnership, we have proactively tested over 14,000 senior housing employees and 1,400 residents. Less than 1% of total tests were positive, demonstrating the effectiveness of the operational protective measures by our operators, such as temperature checks, PPE and cohorting. Our internal task force continues to research emerging COVID-19 testing technologies to ensure our operators and tenants have the best tools to keep our senior housing communities safe and enable them to thoughtfully reopen.

In addition, we took steps to ensure the health, safety, and engagement of our employees, including remote working, additional PTO for COVID, and virtual engagement through remote town hall meetings and a virtual 5k/10k race event that raised \$10,000 for COVID-relief efforts.

Innovative Partnerships: The Ventas research and innovation (R&I) portfolio includes ~30 assets (and a \$1.5 billion development pipeline), nearly all of which are anchored by leading research universities, including the University of Pennsylvania, Yale, Brown, Duke, Washington University in St. Louis and Wake Forest —with startups, incubators, established biotech firms, and corporate juggernauts like Microsoft and Boeing Co. rounding out the tenant mix. These assets form the cornerstone of innovation districts - highly sought-after, medically-focused ecosystems where trailblazing research, medical innovation, and commercialization converge in cutting-edge facilities to bring about groundback groups and life-saving cures. In 2019, in collaboration with our R&I operating partner Wexford Science + Technology, Ventas became a Founding Partner and Steering Committee member of The Global Institute on Innovation Districts worldwide. Ventas and GIID seek to create a global network of innovation districts and provide evidence-based strategies and data to accelerate their work. The tight-Knit (but now global distanced!) ecosystems of innovation districts are uniquely positioned to address issues that COVID-19 has brought to the forefront, by integrating supply and value chains and promoting rapid advancements in medical technology.

Q3

Explain why your company is deserving of recognition as a 2020 Leader in the Light Award winner.

Ventas has been consistently recognized as an ESG leader in real estate, which reflects our strong ESG practices, disclosures and performance. In 2019 we continued our leadership on many fronts, such as the top performing listed healthcare REIT on GRESB for the third consecutive year, and inclusion in the FTSE4G00D sustainability index for the seventh consecutive year. And we achieved many firsts, demonstrating our efforts to continuously integrate and improve our ESG practices: inclusion on the Dow Jones Sustainability World Index, inclusion in the Bloomberg Gender Equality Index, and being ranked the top real estate company in 3BL Media's 100 Best Corporate Citizens of 2020, based on data by ISS ESG.

It is the combination of our day-to-day collaboration with our operators and tenants to curb our portfolio environmental impact, improve the communities in which we operate, protect the health and safety of the tenants and residents in our buildings as well as our employees, and our bold commitments and actions such as committing to 100% LEED development in our \$1.5 billion Research & Innovation portfolio, being the first S&P 500 REIT signatory to the United Nations Global Compact and the first REIT to join the CEO Action for Diversity & Inclusion.

Our ESG leadership starts with our executive leadership team (three of whom sit on our ESG Steering Committee), and is enabled by the dedication of each of our employees who carry out these principles in their daily work.

Q4

For the "Leadership Personified" award, nominate individual leaders in Sustainability/ESG within the REIT industry. The nominated individual must be employed by a Nareit corporate member organization.

1st nomination
Debra A. Cafaro, Chairman and CEO, Ventas
2nd nomination
Kelly Meissner, Director, Sustainability, Ventas
3rd nomination
Sarah Palmisano, Senior Analyst, Sustainability, Ventas
